(In terms of the National Credit Act, 34 of 2005, compound interest at 4% above the prime lending rate of the University's bankers, calculated from the date on which they were due, will be calculated on all amounts in arrears. This interest rate does not exceed the maximum rate as prescribed in this Act.)

A cost estimate for tuition and residence fees for the upcoming year can only be provided on a pro forma basis. This means the estimate is approximate and intended to outline the minimum requirements necessary for students, bursars, or financial institutions to make decisions or complete transactions, pending the finalisation of actual fees.

The cost estimate is therefore only a guideline and not a formal offer/agreement or invoice. This pro forma cost estimate is given when no formal agreement between two parties has been reached yet, so that the estimate is done in anticipation of the conclusion of a transaction. In the higher education context, no agreement is entered into between the NWU and the student before the student is registered as such with the NWU. The student may be accepted beforehand as part of a logistical exercise, but an agreement is only concluded when the student registers with the NWU and for the specific other services.

In anticipation of this agreement, the NWU may issue a pro forma estimate indicating the expected cost, subject to final determination. Only when the student has been registered and a formal statement is presented to him for payment will the correct amount payable be indicated.

Minimum fees are subject to approval by Council.
